

## The “Thermal Clusters System” in health care strategies for 2018-24 in the Russian Federation.

Within the framework of the government scheme “The Nation’s Health. Development priorities for Russia,” promoted in collaboration of the Ministry of Health in cooperation with major Russian medical institutions, the 4<sup>th</sup> International Symposium on the role of Thermal Medicine in prevention, care, and rehabilitation will take place on **May 31, 2018** in Moscow.

The Symposium is promoted and organized by the National Centre for Research and Care for Balneology and Rehabilitation (managed by **Natalia Starzeva**), the main Russian medical institution in the sector. Speakers and moderators will include **Prof. Umberto Solimene**, President of **FEMTEC** (the World Federation of Hydrotherapy and Climatotherapy), one of the entities that sponsor the event.

The meeting will take place at “Gostinniy Dvor”, in downtown Moscow, where an exhibition of medical appliances is also organized.

Details can be found in the website of the event:
