

Havana, July 18, 2203. Cuba

Sincerely Board FEMTEC, all members, friends and Family.

It is with great sadness that we received the news of the physical departure of Professor Humberto Solimene, a great man, friend, professional and tireless fighter for the development of all natural sources and Balneology, among other branches of human knowledge. The World understands that it will be very difficult to fill the space that our beloved professor left us, but in honor of his memory and all his virtues, we must and have the obligation to continue along the path along the route.

Our deepest condolences to the whole family in times as difficult as this. Teacher.

Rafael Ledesma Rose President of the Cuban Society of Medical Hydrology.
President of the International Chair of Health, Thermal and Wellness Tourism

A handwritten signature in black ink, appearing to read 'Rafael Ledesma Rose', with a horizontal line extending from the end of the signature.
