Dear Dr. Busato,

It was with our great sorrow that we received the news of the sad demise of the President of your organization, Mr. Umberto Solimene. Please accept our deepest condolences.

Mr. Solimene was a great person, with both remarkable personal qualities and professional knowledge. It was him who first introduced the world of professional balneologist to us, which opened up a new window for both us and all the others working in the tourism and wellness industry in China.

For more than a decade, He had been working in improving the understanding and utilization of balneology in China, and had done some remarkable contribution to the City of Chongqing especially during the acquiring of the title of The Global Capital of Hot Springs. We believe anyone who had been benefited from his work would appreciate him sincerely.

Please know that Mr. Solimene will always be remembered by us, and please convey our condolences to his family. We believe the relationship between Hakone and FEMTEC will be stronger than ever before.

Sincerely yours,
Yongyi Wang
