How will Covid-19 impact on balneology?
New Thermae in a new world

Online Workshop organized and hosted by FEMTEC - 28 April 2020

EDWARD DE
BONO

- De Bono afferma che, se si affronta un problema con il metodo razionale del pensiero, si ottengono risultati corretti, ma limitati dalla rigidità dei modelli logici tradizionali.

- Quando si richiede invece una soluzione veramente diversa e innovativa, che contribuisca cioè ad un reale passo evolutivo rispetto alle condizioni preesistenti, si deve stravolgere il ragionamento, partire dal punto più lontano possibile, ribaltare i dati, mescolare le ipotesi, negare certe sicurezze e addirittura affidarsi ad associazioni di idee del tutto casuali.

- Si deve perciò abbandonare il pensiero verticale, cioè quello basato sulle deduzioni logiche, per entrare nella lateralità del pensiero creativo.

ILARIA CAPUA

SALUTE CIRCOLARE

Una rivoluzione necessaria

- "One Health" - riconoscendo che la salute delle persone, degli animali e gli ecosistemi sono interconnessi - promuove l'applicazione di un approccio
- collaborativo, multidisciplinare, intersettoriale e coordinato per affrontare i
- rischi potenziali o già esistenti che hanno origine dall' interfaccia tra ambiente-animale-ecosistemi umani.
-

- Per migliorare l'efficacia dell'approccio “One Health” vi è la necessità di stabilire un migliore equilibrio settoriale tra i gruppi e le reti
- esistenti, in particolare tra veterinari e medici, e per aumentare la
- partecipazione degli operatori ambientali e del settore faunistico, così come di
- sociologi, architetti, decisori istituzionali ed esperti dello sviluppo sostenibile.
-

- Il Convegno “**Le terme tra sostenibilità ambientale e promozione della salute**” si propone di analizzare la sostenibilità ambientale in quanto uno degli elementi fondamentali della visione moderna del concetto di “salute globale” (*One Health*: uomo, animali, ambiente). In questa prospettiva, le strutture termali possono collaborare allo sviluppo dell’economia e del turismo locali, valorizzando allo stesso tempo il loro patrimonio storico e favorendo la creazione di reti virtuose sul territorio.
