MEDICAL
HYDROLOGY
7th edition
CENTENARY
of the ISMH

Mineral water natural,
universal, and the
contributions of the
medical hydrology
through the
five continents.

DECEMBER 15 and 16, 2021

Pure, rich in minerals loaded along their underground paths, natural mineral waters emerge everywhere on the planet. For millennia, they have distributed their benefits according to the history, traditions, customs and cultures of each country.

In internal cures, external cures, spas, baths, from Europe to Oceania, from Africa to Asia and America, they are used for curative, preventive, recreational purposes and carry with them promises of health and well-being.

Registration is mandatory on EVENTBRITE. The connection codes will be sent to you after registration on EVENTBRITE. Don't forget to activate the follow-up of the event.

You can register today by following this link:

University of Medical Hydrology

The University of Medical Hydrology is an annual meeting around thermal sciences placed under the patronage of the National Academy of Medicine and in partnership with the University of Lorraine.

This event is organised as a privileged moment of information, training, and exchange of practices and experiences by crossed views in the field of Medical Hydrology.

ISMH CENTENARY

The International Society of Medical Hydrology (ISMH) is a Learned Society founded on 9 December 1921 at the Royal Society of Medicine

**UNIVERSITY OF MEDICAL HYDROLOGY
7th EDITION**

**CENTENARY
of the International Society of Medical Hydrology**

**Production of a memory film : « Centenary of the ISMH »
based on speeches, highlights and interviews...**

I. Natural Mineral Water, a universal source of health

For the 7th edition, the University of Medical Hydrology will focus on natural mineral water, universal water, that connects people without knowing borders.

It is through the contributions of thermal medicine that this wealth offered by the earth to heal, prevent, relax and entertain the men and women of the five continents, will make sense.

II. Under the high patronage of

- National Academy of Medicine,
- International Society of Medical Hydrology and Climatology (ISMH)
- World Federation of Hydrology and Climatology (FEMTEC)
- The Organisation Mondiale du Thermalisme (OMTh)

III. In partnership with

- University of Lorraine,
- Faculty of Medicine of Nancy,
- Faculty of Pharmacy of Nancy,
- Virtual Hospital of Lorraine,
- Lorraine Institute of Training in Kinesitherapy,
- French Society of Thermal Medicine (SFMTH)
- French Society of Thermal Physiotherapy and Advanced Practices (SFKTh),
- European Federation of Teachers of Nursing Sciences (FINE)
- National Council of Thermal Establishments (CNETH)
- Thermal Federation of the Grand Est
- Métropole du Grand Nancy.

IV. Program

As part of the Centenary of the ISMH, the program is co-built by Scientific Council of the 7th University of Medical Hydrology, International Society of Medical Hydrology and Climatology (ISMH) and French Society of Thermal Medicine (SFMTH)

The speakers are University Professors from five continents.

If sanitary conditions allow, will be invited to participate face-to-face.

Wednesday, December 15, 2021

8h30 – 13h00

By videoconference and face-to-face

Council Chamber of the Faculty of Medicine of Nancy
University of Lorraine – France

Discovery of natural mineral water on the 5 continents.

Pure, rich in minerals loaded along their underground paths, natural mineral waters emerge all over the planet and have distributed, for millennia, their benefits according to the history, traditions, uses and cultures of each country.

Spas, baths, internal cures, external cures ... from Europe to Oceania, from Africa to Asia and America ... they are used for curative, preventive, recreational purposes and carry with them promises of health and well-being.

I. RECEPTION / 8h30 – 9h15

II. OPENING / 9h15 – 9h45

III. CONFERENCES - NATURAL AND UNIVERSAL MINERAL WATER ON THE FIVE CONTINENTS / 9h45 – 12h30

Presentation of natural mineral waters on the African, American, Asian and Oceanian continents in the particularity and specificity of their uses both in terms of Health, Well-Being and Leisure.

Representatives from each of the 5 continents will present the resources and uses of natural mineral water for the improvement of health on its continent. Each presentation will be followed by an exchange between the speaker and a member of the Scientific Council of the 7th University of Medical Hydrology.

IV. CENTENARY ISMH / 12h30 – 14h30

The International Society of Medical Hydrology (ISMH) was founded on December 9, 1921, by the Royal Society of Medicine. The ISMH will blow out its 100 candles around a birthday cake on December 15, 2021, in the presence of its President Pedro CANTISTA and many guests to participate in this event.

V. POINT PRESSE ET VISIT NANCY THERMAL 14h30

Thursday, December 16, 2021
8h30 – 17h45

By videoconference and face-to-face
Council Chamber of the Faculty of Medicine of Nancy
University of Lorraine – France

Medical and Scientific Day of the University of Medical Hydrology

In his medical treatises, Hippocrates prescribed a therapeutic use of water. Pliny the Elder described the therapeutic virtues of thermal springs ... These recommendations, these practices described since antiquity, appear as founders of a medical science that establishes its indications and treatments on research work. Now we are talking about thermal medicine, medical hydrology, hydrotherapy, balneotherapy...

- I. RECEPTION / 8h30 – 9h00
- II. TRIBUTE TO PROFESSOR Michel BOULANGE / 9h00 – 9h45
- III. PRESENTATION OF THE GOLD MEDAL OF THE METROPOLE DU GRAND NANCY TO PROFESSOR Jean-Pierre NICOLAS / 9h45 – 10h15

IV. GRADUATION / 10h15 – 11h00

First class of students at the Hydrotherapist Certification of the CHRU of Nancy.

Jacques Parisot Award – Major of the class of 2021

V. OPENING / 11h00 – 12h00

State of the art of medical hydrology research

Focus on the COVIDTHERM clinical study

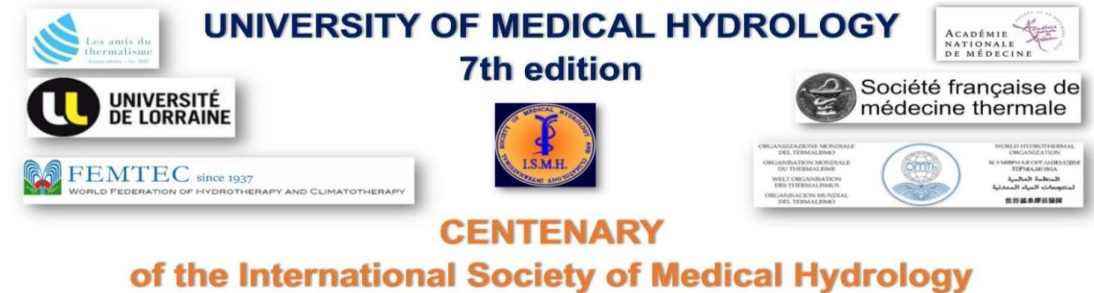

The contribution of thermal research and in particular in the management of viral pathologies, in particular Covid 19 is the challenge to be met at the beginning of the twenty-first century, by Thermal Medicine on the five continents. What are the proposals, the answers, that this multi-millennial therapy submits to the rigor of clinical studies, to participate in the international public health effort in the face of this pandemic?

VI. SCIENCE AND RESEARCH IN THERMAL MEDICINE ON THE FIVE CONTINENTS / 13h30 – 18h00

Presentation of clinical studies in medical hydrology on the five continents:

By the representatives of each of the 5 continents present a clinical study of their choice.

Each presentation will be followed by an exchange between the speaker and a member of the Scientific Council of the 7th University of Medical Hydrology.
