

THE ALGERIAN STRATEGY FOR DEVELOPMENT OF THERMALISM

70TH CONGRESS OF FEMTEC

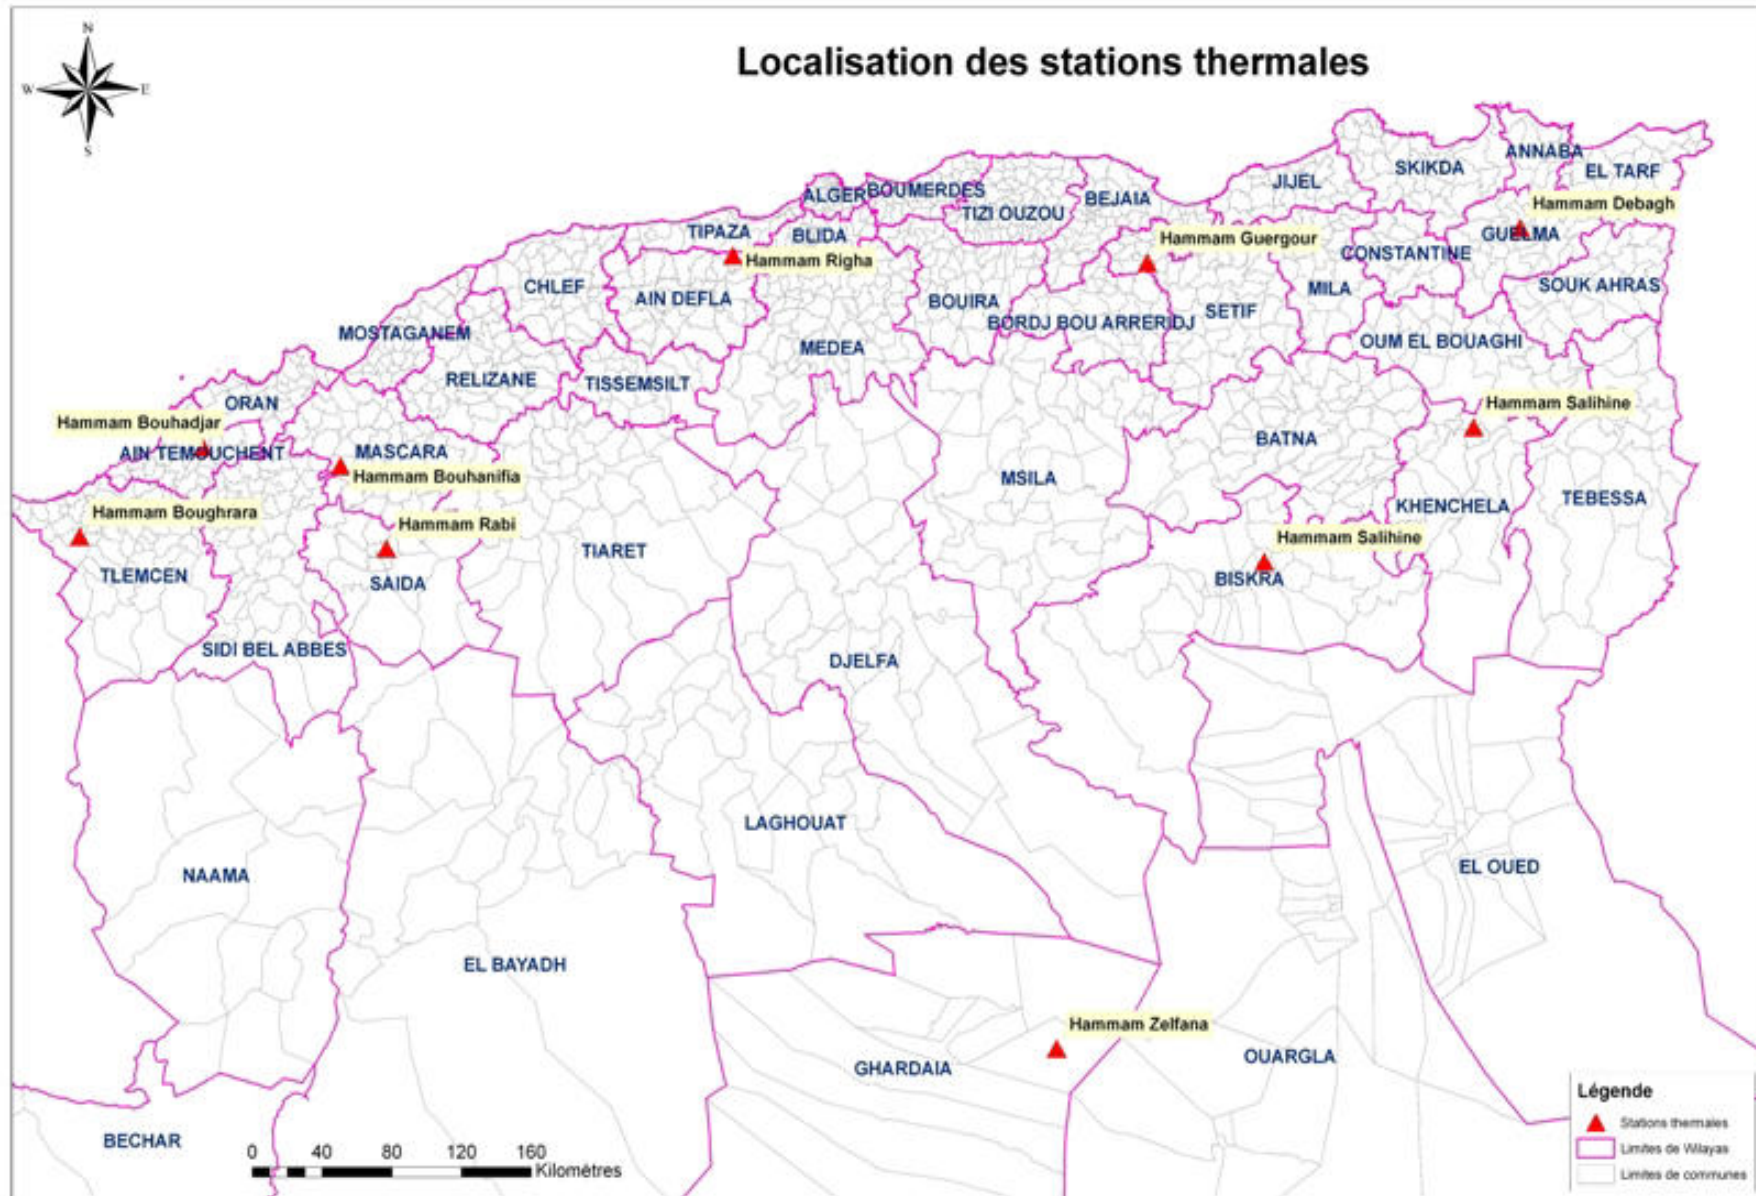

15/20 October 2017
Ischia/Naples/ITALY

Dr A. Belaitar
Guelma ALGERIA

THE ALGERIAN THERMAL
POTENTIAL IS LOCATED IN
THE NORTH OF THE COUNTRY
FROM THE WEST OF
MOROCCO TO THE EAST OF
TUNISIA.

A COAST LINE OF MORE
THAN 1300KM ON THE
MEDITERRANNEAN SEA.

Localisation des stations thermales

- ° These health care centers are all public, managed by minister of the tourism practice a social hydrotherapy activities (social security fund)

- ° The average of the thermal stay is about 01 day to 03 weeks

We Have 300 thermo-mineral sources distributed throughout the national territory:

10% operated by health care Thermal and thalasso centers

40% are used as traditional baths

50% are in a study phase

GRIFFON THERMAL

Considering the increasing demand of the clientele and view the lack of offer and as well as hydrotherapy and thalassotherapy can be a very profitable economic stimulus,

A roadmap was implemented at the beginning of 2010 year called'

**Master Plan for land use planning
2025**

°Rehabilitation, Renovation,
Modernization of existing roman
and traditional thermal baths

°Updating the thermal of all water
sources (extraction, transport,
storage and use)

°Creation a new touristic expansion
zones

°Updating of professionnels and specialized working in the sector of medical hydrotherapy

°Medical and paramedical training of the existing stuff and for the future applicants

°The development of the algerian standards of good thermal practices

THERMAL BATH

ROMAN SWIMMING POOL

°Opening and encouraging private investment in medical hydrotherapy and wellness activities by giving it help and assistance

°Steering and accompanying of all well-being and health care activities
